Making IT Work

**IT support takes too long.** Nagging computer problems constantly sap employee productivity. Networks are too complex and unreliable. IT management costs fluctuate wildly. *Does all this sound familiar?*

With activenet from Bellwether Technology, all that is about to change. In the past, when something went wrong, your IT company would make money by coming out to fix the problem. Our activenet managed service plans are based around the principal that we would work with you to ensure things are running as smoothly as possible. The better we do our job, the less you will see of us, and the more you will get out of your network. You can finally stop paying for downtime. Doesn't that make sense?

## activenet plus

activenet plus gives you the essential daily level of protection you need for your IT environment. We actively monitor your network for viruses, spyware, backup job status and install system patches as needed.

## activenet advanced

With activenet advanced, the most critical components of your IT environment are completely covered. We still use our rigorous preventative maintenance schedule from our plus plan, but now if your server, firewall, or router breaks, it's our problem - not yours.

## activenet complete

activenet complete gives you the peace of mind that your entire network is covered - from the firewall to the workstation and the printer it uses. You receive unlimited on and off-site support as well as all of the monitoring and maintenance of activenet plus.

## activenet universal

Complete IT Management with Offsite Secure Server Hosting. Let Bellwether handle your entire IT environment. We bring your servers offsite to our secure hosting facility and provide total support to everyone in your company. It's like having a full-time IT staff without the expense and the headaches.

### Online Backup

Online Backup ensure that the most important part of your business is safe: your data. We ensure that your data continuously gets backed-up to an offsite, secure facility. No tapes to mess with, no rotation schedules to worry about.

### Hosted Exchange

Let us managed your email. Our Exchange mail server is located off-site and out-of-state to satisfy your disaster preparedness plan. Mail, contacts, and calendars can be accessed and synched using several methods, including any web browser or smartphone.

### Active Shield

Our activeshield service gives you full internet usage reporting, website filtering & IM management, Spyware & Virus blocking, Intrusion Detection & prevention and Bandwidth Optimization and monitoring.

Call or visit our website to see how we can make your IT work.
